

Odyssey of the Mind[®]

Odyssey of the Mind Club!

Fee - \$96 (see below) Grades - 6th - 8th Time - 4:00 Day / Dates - (see below)

Taught by - **Molly Williams**

The Odyssey of the Mind club will be tentatively held on Tuesdays after school. This may change depending on the availability of the students who are interested. The fee may include additional costs if we make it past the first round of the competition! This club will be longer than 8 weeks because the first round of the competition is the beginning of 2018.

We will gauge interest to see how many groups we will have. Once we have dedicated groups, we will begin to solve a problem and prepare for the competition! Odyssey of the Mind has different “problems” that they present, and it is up to each group of students to come up with a creative solution. And let me reiterate “creative”! This will be student-led problem solving, so I will be around to help where needed, but ultimately this will be your project that you can be proud of! I would encourage everyone to check out Odyssey of the Mind site www.odysseyofthemind.com

I will hold an information session for students and parents in the near future, so if you have any questions I will make sure you feel comfortable with it before signing up for the year.

Feel free to contact me at molly.williams@rainbowlearning.org

*Hello, everyone! My name is **Molly** and I will be running Odyssey of the Mind this year! I am new to Rainbow (Assistant 5th Grade) AND new to Asheville. I am from Baltimore, Maryland, where I taught in the heart of the city as a Science, Engineering and Computer Coding teacher for grades K-5. We built bridges, coded Minecraft games, created catapults, had class pets and more. I absolutely love to create things. I am a clawhammer banjo player and my fiancé is a banjo builder! We live at his woodworking factory and just built a teardrop trailer together and took it across the country! I love to knit, sew my clothing, cross stitch, make linoleum prints and build with wood. A creative program like Odyssey of the Mind has me SO excited to see what YOU can create this year!*

Remember, take chances, make mistakes, and get messy!
